## Fund Highlights

### Experienced Private Equity Investor

Pomona Capital has a 27 year track record of success and is a pioneer in investing in private equity secondaries

### Targeted, Secondaries-Focused Private Equity Strategy

Seeks to provide attractive risk-adjusted returns by creating a curated, secondaries-focused portfolio, leveraging Pomona's targeted approach to private equity investing

### Differentiated Access for Investors

Provides broad exposure – with diversification by vintage year, industry, and strategy – in a user-friendly structure that provides transparency and safeguards

## Investment Objective and Strategy

The Fund seeks to provide investors with long-term capital appreciation by investing in a diversified portfolio of private equity investments.

To meet this investment objective, the Fund seeks to acquire high quality, mature assets with identifiable near-term liquidity at compelling prices, where downside and principal risk is limited.

Performance data does not take into consideration account transaction fees or brokerage commissions. The NAV of the Fund will equal, unless otherwise noted, the value of the total assets of the Fund, less all of its liabilities, including accrued fees and expenses, each determined as of the relevant Valuation Date. Total Return based on net asset value per Share is the combination of changes in net asset value per Share and reinvested dividend income at net asset value per Share, if any. These figures are net of all the Fund's fees and expenses, including management and performance incentive fees or allocations payable pursuant to the respective organizational documents of each Investment Fund.

In addition, Underlying Funds generally charge a 1-2% management fee (annualized). The operating expenses of the Underlying Funds are currently estimated to be 1.03% on an annualized basis. This amount is expected to vary over time and does not reflect any performance-based fees or allocations paid by the Underlying Funds. Additionally, Underlying Funds generally charge approximately 20% of net profits as a carried interest allocation. Finally, this amount does not include any other Specified Expenses (as defined in the Fund's prospectus and not included in the above table), such as transaction-related fees or borrowing costs. Please see the Fund's prospectus for a complete description of these expenses.

## Disclosures

The **S&P 500 Index** measures the value of the 500 largest publicly traded corporations by market capitalization listed on the New York Stock Exchange or Nasdaq Composite, and is shown for comparison purposes.

Current net asset value per share may be higher or lower than the data shown. The purchase price per share in the Fund is based on the valuation date applicable to your date of purchase and, as such, the foregoing does not reflect the price per share to be paid by investors in the future.

The information provided regarding holdings is not a recommendation to buy or sell any security. Portfolio holdings are fluid and are subject to daily change based on market conditions and other factors.

**Principal Risks.** An investment in the Fund involves a considerable amount of risk. A Shareholder may lose money. Before making an investment decision, a prospective investor should (i) consider the suitability of this investment with respect to the investor's investment objectives and personal situation and (ii) consider factors such as the investor's personal net worth, income, age, risk tolerance, and liquidity needs. The Fund is an illiquid investment. Shareholders have no right to require the Fund to redeem their Shares in the Fund and, as discussed in the Fund's prospectus, the Fund conducts quarterly tender offers subject to Board approval. Therefore, before investing investors should carefully read the Fund's prospectus and consider carefully the risks that they assume when they invest in the Fund's common shares.

**Investment Risk.** An investment in the Fund involves a high degree of risk, including the risk that the Shareholder's entire investment may be lost. The Fund's performance depends upon the Adviser's selection of Investment Funds and direct investments in operating companies, the allocation of offering proceeds thereto, and the performance of the Investment Funds, direct investments, and other assets. The Investment Funds' investment activities and investments in operating companies involve the risks associated with private equity investments generally. Unexpected volatility or lack of liquidity, such as the general market conditions that prevailed in 2008, could impair the Fund's performance and result in its suffering losses. The value of the Fund's total net assets is expected to fluctuate. To the extent that the Fund's portfolio is concentrated in securities of a single issuer or issuers in a single sector, the investment risk may be increased. The Fund's or an Investment Fund's use of leverage is likely to cause the Fund's average net assets to appreciate or depreciate at a greater rate than if leverage were not used.

**Closed-End Fund; Liquidity Risks.** The Fund is a non-diversified closed-end management investment company designed principally for long-term investors and is not intended to be a trading vehicle. An investor should not invest in the Fund if the investor needs a liquid investment.

**General Private Equity Risks.** The Fund is subject to those risks that are inherent in private equity investments. These risks are generally related to: (i) the ability of each Investment Fund to select and manage successful investment opportunities; (ii) the quality of the management of each company in which an Investment Fund invests; (iii) the ability of an Investment Fund to liquidate its investments; and (iv) general economic conditions. Securities of private equity funds, as well as the portfolio companies these funds invest in, tend to be more illiquid, and highly speculative.

**General Risks of Secondary Investments.** There is no established market for secondaries and the Adviser does not currently expect a liquid market to develop. Moreover, the market for secondaries has been evolving and is likely to continue to evolve. It is possible that competition for appropriate investment opportunities may increase, thus reducing the number and attractiveness of investment opportunities available to the Fund and adversely affecting the terms upon which investments can be made. Accordingly, there can be no assurance that the Fund will be able to identify sufficient investment opportunities or that it will be able to acquire sufficient secondaries on attractive terms.

The Fund is subject to other risks. For a complete listing of all the Fund's risks, with their descriptions, please refer to the "Types of Investments and Related Risks" section of the Fund's prospectus.

**Standard Deviation** is a statistical measure of volatility over time; a lower standard deviation indicates historically less volatility. Annualized standard deviation calculated using quarterly performance.

The Fund's shares do not represent a deposit or obligation of, and are not guaranteed or endorsed by, any bank or other insured depository institution, and are not insured by the FDIC, the Federal Reserve Board or any other government agency. You may lose money by investing in common shares of the Fund.

<sup>1</sup> Fund AUM is calculated as the sum of the Fund's Net Asset Value as of June 30, 2021 (\$376.1 million) and the amount of capital received from subscriptions effective July 1, 2021 (\$32.0 million).

<sup>2</sup> Investors (including allocators) may purchase less than the minimum investment for Class I and Class M2 Shares pursuant to a Letter of Intent, which is further described in the Fund's prospectus.

<sup>3</sup> The tax treatment and characterization of the Fund's distributions may vary significantly from time to time depending on the components of the Fund's net investment income, which may include capital gains, dividends and interest and/or a return of capital. The final composition of the tax characteristics of the distributions cannot be determined with certainty until after the end of the year, and will be reported to shareholders at that time. To the extent that distributions constitute a return of capital, such distributions will have the effect of reducing your cost basis in the Fund's shares and thereby increasing the amount of capital gain, if any, or decreasing the amount of capital loss, if any, that you will realize when selling or exchanging Fund shares. There can be no assurance that the Fund will be able to declare a distribution in any given year.

<sup>4</sup> Calculated as a percent of the total fair value of Pomona Investment Fund's investments as of June 30, 2021.

<sup>5</sup> Since inception calculation for the S&P 500 Index begins on May 7, 2015. All share classes utilize the applicable inception date noted above as the starting point for this calculation. The annualized total return for the S&P 500 from October 1, 2016 through June 30, 2021 is 17.71% and 18.33% for the period from April 1, 2018 through June 30, 2021.

<sup>6</sup> Class I and Class M2 expense ratios are identical; therefore, Pomona expects performance for these share classes to be generally comparable.

<sup>7</sup> Calculated as a percent of the total fair value of Pomona Investment Fund's investments as of March 31, 2021.
