You should consider the investment objectives, risks, charges and expenses of the variable product and its underlying fund options or mutual funds offered through a retirement plan carefully before investing. The prospectuses/prospectus summaries/information booklets contain this and other information regarding the variable product, its underlying fund options or mutual funds offered through a retirement plan and can be obtained by contacting your local representative or by calling (800) 386-3799. Please read the information carefully before investing.

¹ The Adviser has contractually agreed to limit expenses of the Portfolio. This expense limitation agreement excludes interest, taxes, investment-related costs, leverage expenses, and extraordinary expenses and may be subject to possible recoupment. Please see the Portfolio's prospectus for more information. The expense limits will continue through at least 2020-05-01. The Portfolio is operating under the contractual expense limits.

² S&P Target Risk Growth Total Return Index

³ S&P Target Risk Growth Index

⁴ Returns-Based Characteristics are shown for Class I shares only based on 5-yr returns. For definitions, see Glossary of Terms.

Total investment return at net asset value has been calculated assuming a purchase at net asset value at the beginning of the period and a sale at net asset value at the end of the period; and assumes reinvestment of dividends, capital gain distribution and return of capital distributions/allocations, if any, in accordance with the provisions of the dividend reinvestment plan. Net asset value equals total Fund assets net of Fund expenses such as operating costs and management fees. Total investment return at net asset value is not annualized for periods less than one year. Performance does not account for taxes. Returns for other share classes vary due to different charges and expenses.

Effective May 1, 2019, the Adviser changed the primary benchmark from the S&P Target Risk Growth Index to S&P Target Risk Growth Total Return Index.

Disclosures

² The **S&P Target Risk Growth Total Return Index** seeks to provide significant exposure to equities, while also providing increased limited fixed income exposure to diversify risk. The index returns include the reinvestment of dividends and distributions net of withholding taxes, but do not reflect fees, brokerage commissions, or other expenses.

Investors cannot directly invest in an index.

The S&P Target Risk Growth Total Return Index is a product of S&P Dow Jones Indices LLC, a division of S&P Global, or its affiliates ("SPDJ"), and has been licensed for use by Voya. Standard & Poor's® and S&P® are registered trademarks of Standard & Poor's Financial Services LLC, a division of S&P Global ("S&P"); Dow Jones® is a registered trademark of Dow Jones Trademark Holdings LLC ("Dow Jones"). ³ The **Standard and Poor's ("S&P") Target Risk Growth Index** is a broad-based index that seeks to measure the performance of an asset allocation strategy targeted to a growth-focused risk profile. The index is fully investable, with varying levels of exposure to equities and fixed-income through a family of exchange-traded funds. The index offers increased exposure to equities, while also using some fixed-income exposure to diversify risk. The index returns include the reinvestment of dividends and distributions net of withholding taxes, but do not reflect fees, brokerage commissions, or other expenses. **Investors cannot directly invest in an index.**

There may be additional plan level fees resulting in personal performance that varies from stated performance. Please call your benefits office for more information.

Investment Risks: All investing involves risks of fluctuating prices and the uncertainties of rates of return and yield inherent in investing. Securities of **Mid-Sized Companies** may entail greater volatility and less liquidity than larger companies. **Convertible Securities** with longer maturities tend to be more sensitive to changes in interest rates, usually making them more volatile than convertible securities with shorter maturities.

Foreign Investing does pose special risks including currency fluctuation, economic and political risks not found in investments that are solely domestic. The Portfolio may use **Derivatives**, such as options and futures, which can be illiquid, may disproportionately increase losses and have a potentially large impact on Portfolio performance. **High-Yield Securities**, or "junk bonds", are rated lower than investment-grade bonds because there is a greater possibility that the issuer may be unable to make interest and principal payments on those securities. To the extent that the Portfolio invests in **Mortgage-Related Securities**, its exposure to prepayment and extension risks may be greater than investments in other fixed-income securities. The Portfolio may use **Derivatives**, such as options and futures, which can be illiquid, may

disproportionately increase losses and have a potentially large impact on Portfolio performance. **Foreign Investing** does pose special risks including currency fluctuation, economic and political risks not found in investments that are solely domestic. As **Interest Rates** rise, bond prices fall, reducing the value of the Portfolio's share price. Other risks of the Portfolio include but are not limited to: **Market Trends Risks; Other Investment Companies Risks; Price Volatility Risks; Securities Lending Risks; Portfolio Turnover Risks; Credit Risks; Extension Risks; Investment Models Risks; Municipal Securities Risks; Other Investment Companies Risks; Prepayment Risks; Price Volatility Risks; U.S. Government Securities and Obligations Risks; Inability to Sell Securities Risks; Portfolio Turnover Risks; and Securities Lending Risks. Investors should consult the Portfolio's Prospectus and Statement of Additional Information for a more detailed discussion of the Portfolio's risks.**

The strategy employs a quantitative model to execute the strategy. Data imprecision, software or other technology malfunctions, programming inaccuracies and similar circumstances may impair the performance of these systems, which may negatively affect performance. Furthermore, there can be no assurance that the quantitative models used in managing the strategy will perform as anticipated or enable the strategy to achieve its objective.

Glossary of Terms: **Alpha** measures the difference between a fund's actual return and its level of risk as measured by beta. **Beta** measures the Fund's volatility relative to the overall market. **Information Ratio** measures the returns above the returns of a benchmark to the volatility of those returns. **R-Squared** is the way in which a percentage of a portfolio's total returns represents the portfolio's beta measure. **Sharpe Ratio** is a risk-adjusted measure calculated using standard deviation and excess return to determine reward per unit of risk. **Standard Deviation** is a measure of the degree to which an individual probability value varies from the distribution mean.
