Summary

Total Net Assets (\$ millions)	\$138.1
Number of Holdings	43
Distribution Frequency	Quarterly
Morningstar Category	Fund Infrastructure

¹ Out of 75 Infrastructure Funds. 3-year rating 5 Stars out of 75, 5-year rating 5 stars out of 60, 10-year rating - stars out of 22. The Overall Morningstar Rating™ for a fund is derived from a weighted average of the performance figures associated with its 3-, 5-, and 10-year (if applicable) Morningstar Rating metrics. **Rankings for other share classes may be lower due to inclusion of fees in performance rankings. For additional share class information, please visit www.voyainvestments.com. Past performance does not guarantee future results.**

² Out of 85 peers.

An investor should consider the investment objectives, risks, charges and expenses of the Fund(s) carefully before investing. For a free copy of the Fund's prospectus, or summary prospectus, which contains this and other information, visit us at www.voyainvestments.com or call (800) 992-0180. Please read the prospectus carefully before investing.

INVESTMENT MANAGEMENT

Reliable Partner | Reliable Investing®

Fund Highlights

Nimble Approach

Selection driven and risk-conscious, seeking to avoid over concentration while remaining capable of quickly adjusting to evolving markets

Attractive Current Income and Long-Term Performance

Global listed infrastructure dividend yields have been attractive relative to other asset classes and are a significant component of historical total return

Seeks to Protect Against Inflation

Contractual or regulated revenue streams which may provide an inflation hedge

Investment Objective

The Fund seeks to provide total return including capital appreciation and current income.

³ The Adviser has contractually agreed to limit expenses of the Fund. This expense limitation agreement excludes interest, taxes, investment-related costs, leverage expenses, and extraordinary expenses and may be subject to possible recoupment. Please see the Fund's prospectus for more information. The expense limits will continue through at least 2020-03-01. Expenses are being waived to the contractual cap.

⁴ Includes maximum 5.75% sales charge.

⁵ Hybrid Benchmark

⁶ Returns-Based Characteristics are shown for Class I shares only based on 5-yr returns. For definitions, see Glossary of Terms.

Total investment return at net asset value has been calculated assuming a purchase at net asset value at the beginning of the period and a sale at net asset value at the end of the period; and assumes reinvestment of dividends, capital gain distribution and return of capital distributions/allocations, if any, in accordance with the provisions of the dividend reinvestment plan. Net asset value equals total Fund assets net of Fund expenses such as operating costs and management fees. Total investment return at net asset value is not annualized for periods less than one year. Performance does not account for taxes. Returns for other share classes vary due to different charges and expenses.

Disclosures

⁵ The Hybrid Benchmark is the UBS Global Infrastructure & Utilities 50/50 Index through March 31, 2015 and the FTSE Global Core Infrastructure 50/50 Index thereafter due to the discontinuation of the former index. The **UBS Global Infrastructure & Utilities 50-50 Index** (net of dividend withholding taxes) is an unmanaged market-weighted index which consists of infrastructure and utility companies from developed markets whose floats are larger than US \$500 million. The **FTSE Global Core Infrastructure 50-50 Index** captures the performance of listed infrastructure securities in both developed and emerging markets. Constituents are selected by further screening companies who derive revenues from infrastructure related activities within particular Industry Classification Benchmark (ICB) sub-sectors of the FTSE Global All Cap Index. FTSE applies minimum infrastructure revenue thresholds of 65% for constituents of the Core Infrastructure indices. The index returns do not reflect deductions for fees or expenses. **Investors cannot invest directly in an index.**

Due to rounding, numbers presented may not add up to 100% and percentages may not precisely reflect the absolute figures.

The strategy discussed may be available to you as part of your employer sponsored retirement plan. There may be additional plan level fees resulting in personal performance that varies from stated performance. Please call your benefits office for more information.

Investment Risks: Mutual fund investing involves risk, including possible loss of principal. Portfolios concentrated in infrastructure securities and Master Limited Partnerships ("MLPs") may experience price volatility and other risks associated with non-diversification. Investment in infrastructure-related companies may be subject to high interest costs in connection with capital construction programs, costs associated with environmental and other regulations, the effects of economic slowdown and surplus capacity, the effects of energy conservation policies, governmental regulation and other factors. MLPs often own interests related to the oil and gas industries or other natural resources, but may finance other projects. As such, MLPs will be negatively impacted by

economic events adversely impacting that industry. Investments in MLPs may offer fewer legal protections than investments in corporations, and limited voting rights. International investments may involve risk of capital loss from unfavorable fluctuation in currency values, from differences in generally accepted accounting principles or from economic or political instability in other nations. Emerging markets involve heightened risks related to the same factors, as well as increased volatility and lower trading volume. Other risks of the Fund include but are not limited to: **Company; Convertible Securities; Currency; Derivative Instruments; Investment Model; Liquidity; Market; Market Capitalization; Other Investment Companies; and Securities Lending risks. Investors should consult the Fund's Prospectus and Statement of Additional Information for a more detailed discussion of the Fund's risks.**

Glossary of Terms: **Alpha** measures the difference between a fund's actual return and its level of risk as measured by beta. An alpha of 0.5 implies the fund performed 0.5% better than the market would predict. The figure is calculated on a three-year basis relative to the benchmark. **Beta** measures the Fund's volatility relative to the overall market. A beta above 1 is more volatile than the overall market, while a beta below 1 is less volatile. **Information Ratio** measures the returns above the returns of a benchmark to the volatility of those returns. **R²** the way in which a percentage of a portfolio's total returns represents the portfolio's beta measure. **Sharpe Ratio** a risk-adjusted measure calculated using standard deviation and excess return to determine reward per unit of risk. The higher the Sharpe Ratio, the better the fund's historical risk-adjusted performance. **Standard Deviation** a measure of the degree to which an individual probability value varies from the distribution mean. The higher the number, the greater the risk. **Tracking Error** is a measure of financial performance that determines the difference between the return fluctuations of a portfolio and the benchmark.

The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange traded

funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three year rating for 36-59 months of total returns, 60% five year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. Rankings do not take sales loads into account.

The **Lipper Fund Awards**, granted annually, highlight funds and fund companies that have excelled in delivering consistently strong risk-adjusted performance relative to their peers. The Lipper Fund Awards are based on the Lipper Leader for Consistent Return rating, which is a risk-adjusted performance measure calculated over 36, 60 and 120 months. The fund with the highest Lipper Leader for Consistent Return (Effective Return) value in each eligible classification wins the Lipper Fund Award. For more information, see lipperfundawards.com. 51-75	Third Quartile
76-100	Bottom Quartile

fi360 Fiduciary Score®

The **fi360 Fiduciary Score**® is a peer percentile ranking of an investment against a set of quantitative due diligence criteria indicative of prudent fiduciary management. Each investment is evaluated against nine individual factors and thresholds, with points allotted if it fails a particular criterion. Investments with 0 points are automatically given an **fi360 Fiduciary Score**® of 0. Every other investment is given a Score of 1-100 representing their percentile ranking. The lower the Score, the better. The fi360 Fiduciary Score® should not be used as the sole source of information in an investment decision. Visit fi360.com/fi360-Fiduciary-Score for the complete methodology document.
