⁵ S&P Target Risk Moderate Total Return Index

⁶ S&P Target Risk Growth Index

Total investment return at net asset value has been calculated assuming a purchase at net asset value at the beginning of the period and a sale at net asset value at the end of the period; and assumes reinvestment of dividends, capital gain distribution and return of capital distributions/allocations, if any, in accordance with the provisions of the dividend reinvestment plan. Net asset value equals total Fund assets net of Fund expenses such as operating costs and management fees. Total investment return at net asset value is not annualized for periods less than one year. Performance does not account for taxes. Returns for other share classes vary due to different charges and expenses.

* Formerly known as Voya Global Target Payment Fund.

Effective February 28, 2019, the Fund changed its benchmark from the S&P Target Risk Growth Index to S&P Target Risk Moderate Index.

Risks specific to Managed Payment: The Fund is expected to make monthly payments under its Managed Payment Policy regardless of the Fund's investment performance. Because these payments will be made from Fund assets, the Fund's monthly payments may reduce the amount of assets available for investment by the Fund. It is possible for the Fund to suffer substantial investment losses and simultaneously experience additional asset reductions as a result of its payments to shareholders under the Managed Payment Policy. The Fund may, under its Managed Payment Policy, return capital to shareholders which will decrease their costs basis in the Fund and will affect the amount of any capital gain or loss that shareholders realize when selling or exchanging their Fund shares.

An investor should consider the investment objectives, risks, charges and expenses of the Fund(s) carefully before investing.
