An investor should consider the investment objectives, risks, charges and expenses of the Fund(s) carefully before investing. For a free copy of the Fund's prospectus, or summary prospectus, which contains this and other information, visit us at [www.voyainvestments.com](http://www.voyainvestments.com) or call (800) 992-0180. Please read the prospectus carefully before investing.

<sup>1</sup>The Adviser has contractually agreed to limit expenses of the Fund. This expense limitation agreement excludes interest, taxes, investment-related costs, leverage expenses, and extraordinary expenses and may be subject to possible recoupment. Please see the Fund's prospectus for more information. The expense limits will continue through at least 2020-03-01. Expenses are being waived to the contractual cap.

<sup>2</sup>Includes maximum 5.75% sales charge.

<sup>3</sup>MSCI EAFE Index

<sup>4</sup>MSCI World Index

Total investment return at net asset value has been calculated assuming a purchase at net asset value at the beginning of the period and a sale at net asset value at the end of the period; and assumes reinvestment of dividends, capital gain distribution and return of capital distributions/allocations, if any, in accordance with the provisions of the dividend reinvestment plan. Net asset value equals total Fund assets net of Fund expenses such as operating costs and management fees. Total investment return at net asset value is not annualized for periods less than one year. Performance does not account for taxes. Returns for other share classes vary due to different charges and expenses.

\* Formerly known as the Voya Global High Dividend Low Volatility Fund.

Effective May 1, 2018, the Fund changed its benchmark from the MSCI World Index<sup>SM</sup> to the MSCI EAFE<sup>®</sup> Index.

## Disclosures

<sup>3</sup> The **MSCI Europe, Australasia and Far East (EAFE) Index** is an unmanaged index that measures the performance of securities listed on exchanges in markets in Europe, Australasia and the Far East. The Index does not reflect fees, brokerage commissions, taxes or other expenses of investing. **Investors cannot directly invest in an index.**

<sup>4</sup> The **MSCI World Index** is an unmanaged free float-adjusted market capitalization index that is designed to measure global developed market equity performance. The Index does not reflect fees, brokerage commissions, taxes or other expenses of investing. **Investors cannot directly invest in an index.**

Due to rounding, numbers presented may not add up to 100% and percentages may not precisely reflect the absolute figures.

The strategy discussed may be available to you as part of your employer sponsored retirement plan. There may be additional plan level fees resulting in personal performance that varies from stated performance. Please call your benefits office for more information.

**Investment Risks:** You could lose money on an investment in the Fund. Any of the following risks, among others, could affect Fund performance or cause the Fund to lose money or to underperform: **Company:** The price of a company's stock could decline or underperform. The Fund may

use **Derivatives**, such as options and futures, which can be illiquid, may disproportionately increase losses and have a potentially large impact on Fund performance. Companies that issue **Dividend** yielding equity securities are not required to continue to pay dividends on such securities and can reduce or eliminate the payment of dividends in the future.

**Foreign Investing:** poses special risks including currency fluctuation, economic and political risks not found in investments that are solely domestic. Because the Fund may invest in **Other Investment Companies**, you may pay a proportionate share of the expenses of that other investment company, in addition to the expenses of the Fund. Risks of the **REIT's** are similar to those associated with direct ownership of **Real Estate**, such as changes in real estate values and property taxes, interest rates, cash flow of underlying real estate assets, supply and demand, and the management skill and credit worthiness of the issuer.

**Investment Model:** A manager's proprietary model may not adequately allow for existing or unforeseen market factors or the interplay between such factors. Volatility management techniques may not always be successful in reducing volatility, may not protect against market declines, and may limit the Fund's participation in market gains. Mistakes in the construction and implementation of the investment models may create errors or limitations that might go undetected. There is no guarantee that

the use of these investment models will result in effective investment decisions. Other risks of the Fund include but are not limited to: **Currency, Liquidity, Market, Market Capitalization, Securities Lending.** Investors should consult the Fund's Prospectus and Statement of Additional Information for a more detailed discussion of the Fund's risks.

The strategy employs a quantitative model to execute the strategy. Data imprecision, software or other technology malfunctions, programming inaccuracies and similar circumstances may impair the performance of these systems, which may negatively affect performance. Furthermore, there can be no assurance that the quantitative models used in managing the strategy will perform as anticipated or enable the strategy to achieve its objective.

**Glossary of Terms:** **EPS Growth (3-5 Year Estimate)** is the portion of a company's profit allocated to each outstanding share of common stock. **Price to Book (trailing 12 months)** calculates the ratio of a stock's price to its book value. **Price to Cash Flow** is the ratio of a stock's price to its cash flow per share. **Price to Earnings (next 12 months)** calculates the price of a stock divided by its earnings per share. **Weighted Average Market Capitalization** is the value of a corporation as determined by the market price of its issued and outstanding common stock.
