

Voya Large Cap Value SMA

Strategy-at-a-glance

Objective ¹	To outperform the Russell 1000 Value Index over full market cycles
Inception Date	01/01/08
Benchmark	Russell 1000 Value Index

¹ There is no guarantee that this objective will be achieved.

Strategy overview

The Large Cap Value strategy seeks to outperform its benchmark over a full market cycle via an actively managed approach relying on fundamental research to capture the benefits of high excess capital yield and sustainable dividends.

Investment philosophy

We believe that successful value investing is best achieved by focusing on companies with high excess capital yield combined with a disciplined risk management overlay to build a portfolio with returns driven primarily by stock selection.

Our key beliefs:

- Focusing on excess capital yield is key to identifying high quality companies
- Active risk driven by stock selection is necessary to deliver superior performance
- Risk management at the portfolio level is necessary to understand drivers of risk and return

Investment process

Our disciplined, bottom-up investment process focuses on high-conviction stock selection. The process begins by identifying companies with strong capital returns prospects through the triangulation of excess capital yield, relative valuation and qualitative insights from our well-tenured analysts. Excess capital yield is a dynamic measure that isolates the "dry powder" available to management to facilitate value creation. Our sector specific analysts focus on the decomposition of excess capital yield and relative multiple deviation in conjunction with our proprietary multi-factor sector models. This allows our analysts to concentrate their efforts on the highest ranked stocks within their respective sectors while finding their highest conviction ideas through in-depth fundamental research and analysis. Portfolio construction is based on the attractiveness each stock, analyst/portfolio manager conviction, and active weights impact on relative risk exposure and relative factor exposures.

Performance

Voya Large Cap Value SMA

Voya Investment Management claims compliance with the Global Investment Performance Standards (GIPS®). GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein. To learn more on the GIPS® compliance Schedule of Composite Performance go to: <https://institutional.voya.com/document/product/gips.pptx>.

Past performance does not guarantee future results. The Composite performance information represents the investment results of a group of fully discretionary accounts managed with the investment objective of outperforming the benchmark. Gross returns are presented after all transaction costs, but before management fees. Net-of-fees returns presented are calculated by subtracting a hypothetical maximum total wrap fee (estimated at 3.00% per annum) from the monthly gross-of-fees returns. The total wrap fee includes transaction costs, portfolio management, investment advisory, custodial and other administrative costs. Wrap fees vary amongst brokerage firms and may be negotiated based on account size and other factors.

Voya Investment Management

Voya Investment Management provides both core and specialized investment strategies to institutions, financial intermediaries and individual investors worldwide. Drawing on a 50-year legacy of active investing and the expertise of over 300 investment professionals, Voya Investment Management manages approximately \$306 billion* in assets across public and private fixed income, equities, multi-asset solutions and alternative strategies.

Our culture is grounded in a commitment to understanding and anticipating clients' needs, producing strong investment performance, and seeking to embed diversity, equity and inclusion in everything we do. Voya Investment Management is the asset management business of Voya Financial (NYSE: VOYA), a leading health, wealth and investment company with 9,000 employees dedicated to serving the needs of over 14 million individual and workplace clients.

*As of 09/30/23. Voya IM assets are calculated on a market value basis and include proprietary insurance general account assets of \$32 billion.

Voya Investment Management ("Voya IM") acts as a discretionary investment manager or non-discretionary model provider in a variety of separately managed account or wrap fee programs (SMAs) sponsored by a third party investment adviser, broker-dealer or other financial services firm. When acting as a non-discretionary model provider, Voya IM is limited to providing investment recommendations (in the form of models) to the SMA program sponsor who may or may not, in their sole discretion, utilize such recommendations. Individual portfolio performance and holdings may differ from information shown due to decisions made by the program sponsor, the size and timing of cash flows and client-specific investment guidelines and objectives. You should review this information with your financial professional, who can discuss the program with you and address questions you may have. Managed money programs may not be appropriate for all investors. Since no one manager/investment program is appropriate for all types of investors, your investment objectives, risk tolerance, and liquidity needs must be reviewed before appropriate managers/investment programs can be introduced to you.

Outside of the United States, this document is issued for information purposes only. It is not to be construed as an offer or solicitation for the purchase or sale of any financial instruments. Voya Investment Management Co. LLC ("Voya IM") is a U.S. Registered Investment Adviser, and it is not licensed to engage in investment management or investment advisory business in other jurisdictions. As such, the products, services or strategies shown here may not be available in certain jurisdictions or to certain investors.

The principal risks are generally those attributable to investing in stocks and related derivative instruments. Holdings are subject to market, issuer, and other risks, and their values may fluctuate. Market risk is the risk that securities or other instruments may decline in value due to factors affecting the securities markets or particular industries. Issuer risk is the risk that the value of a security or instrument may decline for reasons specific to the issuer, such as changes in its financial condition.

The strategy employs a quantitative model to execute the strategy. Data imprecision, software or other technology malfunctions, programming inaccuracies and similar circumstances may impair the performance of these systems, which may negatively affect performance. Furthermore, there can be no assurance that the quantitative models used in managing the strategy will perform as anticipated or enable the strategy to achieve its objective.

The **Russell 1000 Index** includes approximately 1000 of the largest capitalization securities within the float-adjusted, market-capitalization-weighted Russell 3000 Index. The **Russell 1000 Value Index** includes those Russell 1000 Index companies with lower price-to-book ratios and lower expected growth values. Index returns do not reflect fees, brokerage commissions, taxes or other expenses of investing.
