## Strengthen menu of DC investment choices

### Voya is a Leader in DC Asset Management

One of the **20 largest managers**<sup>1</sup> of U.S. defined contribution assets

**\$42 billion**<sup>2</sup> under management on behalf of defined contribution clients

**30,000+ plans**<sup>3</sup> use our investment capabilities

### DC Offerings Built Around the Requirements of Retirement Plan Investors

DC plan participants have particular needs, expectations and preferences that differ from those of traditional investors. As such, we approach the design and management of our DC product line with a fiduciary's eye toward suitability, prudence and conservatism. We believe DC investment options should exhibit the following characteristics:

- Robust and time-tested investment process
- A stable and talented investment team with a tenure of three years or more
- Attractive performance evidenced by strong risk-adjusted returns, asymmetric upside/downside capture and modest yet stable alpha
- Low tracking error and style purity to allow for the design of asset allocation around core building blocks and avoid large negative surprises
- Transparency of process and results

<sup>1</sup> *Pensions & Investments*, "The Largest Money Managers," 2023 Survey, based on assets as of 12/31/22.

<sup>2</sup> As of 12/31/23, the DC assets excludes approximately \$33 billion in assets under administration.

<sup>3</sup> As of 12/31/23.

 \* Data shown reflects Class R6, except for Voya Multi-Manager International Small Cap Fund which depicts Class I shares.  
 \*\* RPAG score shown reflect Class I.

Historical performance shown for Class R6 shares reflects the historical performance of Class A,I, and SMA shares for periods prior to the inception of Class R6 (represented by italicized text). Historical performance of Class R6 shares likely would have been different because of differences in expenses attributable to each share class.

**Investment Risks**

As with any portfolio, you could lose money on your investment in a Voya Target Retirement Fund. Although the strategy seeks to optimize risk-adjusted returns given various time horizons, you still may lose money and experience volatility. Forward looking asset class assumptions and market judgement are used to form the asset allocations for the Voya Target Retirement Fund. There is risk that you could achieve better returns in an underlying portfolio or other portfolios representing a single asset class than in the Voya Target Retirement Fund. Important factors to consider when planning for retirement include your expected expenses, sources of income, and available assets. Before investing in the Target Retirement Fund, weigh your objectives, time horizon, and risk tolerance. The Voya Target Retirement Fund invests in many underlying portfolios which are exposed to the risks of different areas of the market. The higher a portfolio's allocation to stocks, the greater the risk. Diversification cannot assure a profit or protect against a loss in a declining market.

Historical performance shown for Class R6 shares reflects the historical performance of Class I shares for periods prior to the inception of Class R6 (represented by italicized text). Historical performance of Class R6 shares likely would have been different because of differences in expenses attributable to each share class.

<sup>1</sup> The Adviser has contractually agreed to limit expenses of the Fund. This expense limitation agreement excludes interest, taxes, investment-related costs, leverage expenses, and extraordinary expenses and may be subject to possible recoupment. Please see the Fund's prospectus for more information.

<sup>2</sup> Current Maximum Sales Charge: 5.75%.

<sup>3</sup> Expenses are being waived to the contractual cap.

<sup>4</sup> The Fund's Acquired (Underlying) Funds Fees and Expenses are based on a weighted average of the fees and expenses of the Underlying Funds in which it invests. The amount of fees and expenses of the Underlying Funds borne by the Fund will vary based on the Fund's allocation of assets to, and annualized net expenses of, the particular Underlying Funds during the Fund's fiscal year.

## Share Class Payout Options

	A Share	I Share	R Share	R6	W
Trail	0.25% / 13 <sup>th</sup> Month	None	0.50% / 13 <sup>th</sup> Month	None	None
Service Fee (Equity)*	Up to 0.25%	Up to 0.25%	Up to 0.25%	None	Up to 0.25%
Service Fee (Fixed Income)*	Up to 0.15%	Up to 0.15%	Up to 0.15%	None	Up to 0.15%
Fund Minimum	\$0	\$0	\$0	\$0 For Retirement Plans	\$1,000

\* Payouts may vary depending on platform requirements.

**Class A – Purchases Above \$1 Million:** There is no initial sales charge on purchase of \$1,000,000 or more of Class A shares. However, the Distributor will pay commissions to dealers of record. Please contact your representative for Voya's Fund Share Class Pricing Schedule.

### Morningstar Medalist Rating™

The **Morningstar Medalist Rating™** is the summary expression of Morningstar's forward-looking analysis of investment strategies as offered via specific vehicles using a rating scale of Gold, Silver, Bronze, Neutral, and Negative. The Medalist Ratings indicate which investments Morningstar believes are likely to outperform a relevant index or peer group average on a risk-adjusted basis over time. Investment products are evaluated on three key pillars (People, Parent, and Process) which, when coupled with a fee assessment, forms the basis for Morningstar's conviction in those products' investment merits and determines the Medalist Rating they're assigned. Pillar ratings take the form of Low, Below Average, Average, Above Average, and High. Pillars may be evaluated via an analyst's qualitative assessment (either directly to a vehicle the analyst covers or indirectly when the pillar ratings of a covered vehicle are mapped to a related uncovered vehicle) or using algorithmic techniques. Vehicles are sorted by their expected performance into rating groups defined by their Morningstar Category and their active or passive status. When analysts directly cover a vehicle, they assign the three pillar ratings based on their qualitative assessment, subject to the oversight of the Analyst Rating Committee, and monitor and reevaluate them at least every 14 months. When the vehicles are covered either indirectly by analysts or by algorithm, the ratings are assigned monthly. For more detailed information about these ratings, including their methodology, please go to [global.morningstar.com/managerdisclosures/](https://global.morningstar.com/managerdisclosures/). The Morningstar Medalist Ratings are not statements of fact, nor are they credit or risk ratings. The Morningstar Medalist Rating (i) should not be used as the sole basis in evaluating an investment product, (ii) involves unknown risks and uncertainties which may cause expectations not to occur or to differ significantly from what was expected, (iii) are not guaranteed to be based on complete or accurate assumptions or models when determined algorithmically, (iv) involve the risk that the return target will not be met due to such things as unforeseen changes in management, technology, economic development, interest rate development, operating and/or material costs, competitive pressure, supervisory law, exchange rate, tax rates, exchange rate changes, and/or changes in political and social conditions, and (v) should not be considered an offer or solicitation to buy or sell the investment product. A change in the fundamental factors underlying the Morningstar Medalist Rating can mean that the rating is subsequently no longer accurate.

### Morningstar Rating and Rankings

**Morningstar computes the extended performance return stream by appending an adjusted return history of the oldest share class. Next, the Extended Performance Rating is determined by comparing the adjusted-historical returns to the current investment universe to identify placement in the bell curve used to assign the Morningstar Rating. Extended Performance Ratings appear as hollow stars on reports and statistics calculated with extended performance data appear in italics for easy identification.**

The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods.

Morningstar's methodology for calculating rankings for collective trusts is to rank them relative to an equivalent Morningstar Category within the US Open End Fund universe rather than their actual Morningstar Category within the US Separate Account/Collective Trust universe. For example, a large cap blend collective trust's ranking is based on percentile ranking breakpoints of the US Open End Fund Large Blend category rather than the US Separate Account/Collective Trust Large Blend universe.

**\* Rankings for other share classes may be lower due to inclusion of fees in performance rankings.**

**For additional share class information, please visit [www.voyainvestments.com](http://www.voyainvestments.com).**

### RPAG Scorecard<sup>SM</sup>

The **Scorecard<sup>SM</sup> System methodology** incorporates both quantitative and qualitative factors in evaluating fund managers and their investment strategies. The Scorecard<sup>SM</sup> System is built around pass/fail criteria, on a scale of 0 to 10 (with 10 being the best) and has the ability to measure Active, Passive and Asset Allocation investing strategies. Active and Asset Allocation strategies are evaluated over a five-year time period, and Passive strategies are evaluated over a three-year time period.

### Fi360 Fiduciary Score<sup>®</sup>

The **Fi360 Fiduciary Score<sup>®</sup>** is a peer percentile ranking of an investment against a set of quantitative due diligence criteria indicative of prudent fiduciary management. Each investment is evaluated against nine individual factors and thresholds, with points allotted if it fails a particular criterion. Investments with 0 points are automatically given an Fi360 Fiduciary Score<sup>®</sup> of 0. Every other investment is given a Score of 1-100 representing their percentile ranking. The lower the Score, the better.

The Fi360 Fiduciary Score<sup>®</sup> should not be used as the sole source of information in an investment decision. Visit [Fi360.com/Fi360-Fiduciary-Score](https://Fi360.com/Fi360-Fiduciary-Score) for the complete methodology document.

**Investment Risks**

**Domestic Equity:** Exposure to financial and market risks that accompany investments in equities. Markets are volatile and can decline significantly in response to adverse issuer, political, regulatory, market or economic developments. Small-cap stocks may be more volatile and less liquid than stocks of larger, more established companies.

**Fixed Income:** Exposure to financial, market, prepayment, credit and interest rate risks. The value of an investment in a fund is not guaranteed and will fluctuate. Higher yielding bonds are subject to greater volatility and credit risks. A fund may invest in securities guaranteed by the U.S. government as to timely payment of interest and principal, but a fund's shares are Not Insured or Guaranteed. Bonds have fixed principal and return if held to maturity, but may fluctuate in the interim. Generally, when interest rates rise, bond prices fall. Bonds with longer maturities tend to be more sensitive to changes in interest rates.

**International:** In addition to the general risks of investing in equities and fixed income securities, investing in foreign securities poses special risks, including currency fluctuation, economic and political risks not found in investments that are solely domestic. Risks of Foreign Investing are generally intensified for investments in emerging markets.

**REITs:** Real Estate Investment Trusts may be sensitive to factors such as changes in real estate values and property taxes, interest rates, cash flow of underlying real estate assets, supply and demand, and the management skill and credit-worthiness of the issuer. REITs may also be affected by tax and regulatory requirements.

**Non-Diversified Funds/Sector Funds:** Due to the concentrated nature of non-diversified and sector funds, they may experience greater volatility than funds with a broader investment selection/strategy.

**Target Date:** As with any portfolio, you could lose money on your investment in a Target Date Fund/Trust. Although the strategy seeks to optimize risk-adjusted returns given various time horizons, you still may lose money and experience volatility. Forward looking asset class assumptions and market judgment are used to form the asset allocations for the Voya Target Retirement Fund/Trust. There is risk that you could achieve better returns in an underlying portfolio or other portfolios representing a single asset class than in the Voya Target Retirement Fund/Trust. Important factors to consider when planning for retirement include your expected expenses, sources of income, and available assets. Before investing in the Voya Target Retirement Fund/Trust, weigh your objectives, time horizon, and risk tolerance. The Voya Target Retirement Fund/Trust invests in many underlying portfolios which are exposed to the risks of different areas of the market. The higher a portfolio's allocation to stocks, the greater the risk. Diversification cannot assure a profit or protect against loss in a declining market.
