

Investment Weekly

For the week ended Nov 21, 2025

Commentary

Weekly summary: The labor market, a potential AI-bubble, and the December Fed meeting drove the markets this week.

Wishing you a happy Thanksgiving! 🦃

Markets review

- **A rough week for U.S. equities**, especially the AI-heavy Nasdaq as worries of a bubble percolated. The S&P 500 fell for a second week in the past three and the Nasdaq was down for a third-straight week. Communication services and health care were the best performing sectors and technology was the worst. Value outperformed growth and small cap bested large caps. Overseas markets had a rough week too.
- **Treasuries fell as the curve flattened.** The U.S. Agg reached over 7% gains YTD.
- **The dollar rose.** Bitcoin futures had the worst week since 02/25.

Economic review

- **The Dec Fed meeting and labor were in focus.**
 - December rate cut odds fell after the BLS confirmed it would not release an October payrolls report, and the November release would come after the December FOMC meeting. November CPI will also come after the meeting.
 - However, odds rose after downward revisions showed a contraction and weaker wage growth in August despite September payrolls coming in better than expected. The unemployment rate ticked up to 4.4%, the highest level since 10/21. Continuing jobless claims were also the highest since that time. Finally, ADP's estimate of average job losses was lower than what was reported for the four weeks ended 10/25.
- S&P Global Flash Manufacturing PMI for November fell to a four-month low and below consensus. Conversely, flash Services PMI hit a four-month high, in line with estimates. Digging deeper, **input cost inflation accelerated to the fastest rate in three years on tariffs.**
- **November Philadelphia Fed index—which measures the health of the manufacturing sector—surprisingly missed**, as prices paid remained elevated and the employment index rose.
- Housing: **October existing home sales hit the best level since 02/25.**

Earnings review

- **3Q25 earnings:** 94% of S&P 500 companies reported. The blended earnings growth rate was 14.7% and the revenue growth rate was 8.2%. So far, 83% of S&P 500 companies beat consensus EPS expectations.
