

Investment Weekly

For the week ended Mar 13, 2026

Commentary

Weekly summary: The war in Iran and its broader impacts remained the story for the markets.

Markets review

- **U.S. equities fell again, for the third straight week.** Energy and utilities were the only positive sectors while consumer discretionary led the way down. YTD, midcaps are performing the best. Overseas markets were also down with Japan faring the worst.
- Treasury yields rose across the curve. **Rate cut expectations for 2026 were reduced, with now less than 25 bp expected this year.** The Agg is barely holding onto gains for the year.
- **The dollar was stronger** while gold and silver fell. Bitcoin futures rose.
- WTI crude oil was up again amid the ongoing Mideast disruptions. **Oil is up almost 50% since the start of the conflict.**

Economic review

- **Energy was the focus this week:** The shipping standstill around the Strait of Hormuz and shut-in output by Persian Gulf producers pushed crude prices near \$100/barrel.
- **Private credit was also an area of concern** with companies marking down some software-related loans, while some funds restricted redemptions.
- **Tariffs remained front and center** for the president as he seeks a workaround.
- Inflation: **February CPI reported in line with consensus** but did not include the effects of the war on oil prices. January headline and core PCE were in line as well.
- Economic growth: The second read of **4Q25 GDP was revised lower** on downward adjustments to consumer/government spending.
- Good orders were generally in line with consensus.
- Preliminary UMich **consumer sentiment was lower.** Small business optimism fell again, too.
- January housing data was solid.

Earnings review

- **4Q25 earnings season is over.** With 99% of S&P 500 companies reported, the blended earnings growth rate was 14.1% and the revenue growth rate was 9.2%. 73% of S&P 500 companies beat consensus EPS expectations.
